

**LETTER OF ANNOUNCEMENT
TARGET MARKET FOR TESTING AND CERTIFICATION**

Friday, the 2nd of February 2018

Dear On-boarding Partner,

EMVO contacts you with respect to the Technical On-boarding and the markets in ITE and IQE.

In the ITE and IQE environments of the Technical On-boarding, your company is requested to test and certificate its connection which implies providing information on which market the company intends to deliver its products. At the moment, all tests in ITE and certifications in IQE have been conducted against either AT (Austria) or GB (United Kingdom) as “simulated markets”.

From Monday 5th February onwards, 3 new markets/countries will be replacing AT and GB in the Hub, for testing in ITE and certification in IQE. Those 3 new country codes, referring to simulated national systems, will be:

- XX
- XY
- XZ

The name of the 3 national systems follow this naming convention “National System for Emulation XX” etc. The behavior of each national system will be the same.

As a result, all OBPs, no matter what country they intend to upload product to in PRD, will need to fill-in one of the above-mentioned possibility as a target market in ITE and IQE.

If you want to upload product in IQE to real markets then please arrange this with the dedicated NMVO. Certification however still needs to be completed against the 3 new markets.

In PRD, your company will, of course, be able to fill-in the intended market it would like to upload data for in the Hub.

If you have any further question or uncertainty, please do not hesitate to contact our Helpdesk:
