**Letter of Announcement
Spanish Medicines Verification System**

Dear stakeholders,

It is a great pleasure to announce the connection of the Spanish Medicines Verification System to the European Hub production environment.

This important milestone was successfully achieved thanks to the intensive efforts and engagement of SEVeM team members, the productive collaboration with other NMVOs, the dedication of our IT provider, the guidance from EMVO during the onboarding process, and the continuous commitment of SEVeM Management Board and our authorities in this project.

During the next months, we will continue our project with participants ready to onboard to the EU Hub and with end-users ready to connect to the Spanish Medicines Verification System.

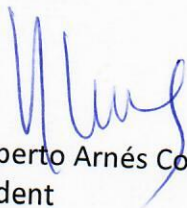

We kindly invite all Marketing Authorisation Holders (MAH) to connect to the EMVS and start to upload data to the EU Hub for all serialized products designated for the Spanish market.

We would like to emphasize that, in addition to the contract that each MAH must sign with EMVO through its OBP, the contract to be signed between MAH and SEVeM and the corresponding fees will be available from the end of September.

If you require any additional information do not hesitate to contact us.

Please visit our website <https://www.sevem.es> to keep updated or contact us directly by email sevem@sevem.es.

With kind regards,

Humberto Arnés Corellano
President
