

Vienna, June 2018

Dear FMD-stakeholders!

We are pleased to announce that on June 4th, the Austrian Medicines Verification System (AMVS) was connected to the European Hub live production environment.

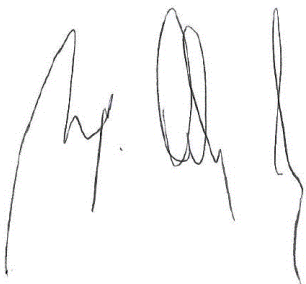

This important milestone was successfully completed in collaboration with other NMVO's, ARVATO and with support by the EMVO team. Furthermore, with the excellent support of the AMVO Board members, who continuously worked on this project over the last two years.

Starting in the following weeks, we will execute the next phase of our project with participants ready to onboard to the EU Hub and with end-users ready to connect to the national system.

We kindly ask manufacturers and OBP's to start uploading product and pack data (products for the Austrian market) to the EU Hub as soon as possible to support the common success of the project.

For further information about AMVS – Austrian Medicines Verification System, please visit our website www.amvs-medicines.at or contact us by email (office@amvs-medicines.at).

With kind regards,

Andreas AchRAINER
General Manager
Austrian Medicines Verification System GmbH
