

Prague 26th April 2018

The Czech Republic Medicines Verification System Goes Live

We are pleased to inform you that on April 25th, 2018 the Czech Medicines Verification System (CZMVS) was connected to the European Hub production environment.

This is a great news for our stakeholders as well as a whole Czech Medicines Verification Organization (NOOL) established on 6th March 2017 by representative stakeholder associations namely; AEDL (Association of European Distributors of Pharmaceuticals), AIFP (The Association of Innovative Pharmaceutical Industry), AVEL (Association of Wholesale Distributors of Pharmaceuticals), ČAFF (Czech Association of Pharmaceutical Companies), ČLnK (Czech Chamber of Pharmacists).

I would like to use this opportunity to thank all the parties that participated on this success and helped us to achieve this important milestone in the project of implementation FMD requirements in the Czech Republic. Special thanks to our colleagues from ZAPAZ, who lead the testing in cooperation with our team and other countries as well as Solidsoft Reply team.

The Czech NMVS is now open for the first manufactures to upload the data of their serialized products designated for Czech market. Starting next week, we are prepared to activate pilot with our pilot participants – selection of distributors, hospital and general pharmacies, IT providers and producers who expressed their readiness and intend to test with us the system and related process in the “real life”. All other subjects affected by FMD should be able to on-board and prepare themselves within following 9 months.

For more information related to FMD implementation in the Czech Republic you can visit our website www.czmvo.cz or contact us directly on info@czmvo.cz.

Jakub Dvořáček

Chairman of the Board

Czech Medicines Verification Organisation (NOOL)
