

Needed: Application Architect

The European Medicines Verification Organization

The European Medicines Verification Organization (EMVO) is the Brussels-based organisation responsible for the formation of the European Medicines Verification System (EMVS). The EMVS is a European-wide system created to prevent falsified medicines from entering the legal supply chain.

EMVO was created in 2015 as a joint initiative of EU supply chain stakeholders, representing pharmaceutical manufacturers, wholesalers, community pharmacists and hospitals. EMVO ensures the implementation of a functioning, secure, interoperable and cost-effective system across Europe, to ensure patient health and safety.

A fantastic opportunity is available for an Application Architect to join our team. You will make a critical contribution to the successful running of the EMVS and be involved in a project that is of vital importance to the European pharmaceutical sector and all European citizens.

Reporting to EMVO's Head of Operations, you will be working in a small team with other IT-specialists and will become an expert in the European Medicines Verification System (EMVS) and help to ensure the interoperability of the entire EMVS system.

Your main tasks:

- To be part of the Change Advisory Board.
- To define and ensure the technical (evolution of the) EMVO System Landscape/Architecture
- To ensure the technical interoperability of the cloud based EMVS Ecosystem.
- To closely collaborate with the System Suppliers and ensure the quality of the software development.
- To understand the infrastructural needs of the EMVO systems, in order to steer and monitor the System Suppliers.
- To guide these System Suppliers to innovate in time.
- To provide advice to the design/architectural and technical decisions.
- To understand the cost model of developing, maintaining and operating the System.
- To share/transfer your expertise with the colleagues of EMVO and to help them in their day-to-day support and incident management activities.

Skills & Competencies

- At least 5 years' experience as an Application Architect / Engineer
- Broad technological background of several technological environments, certainly Microsoft.NET and Azure.
- Enhanced infrastructural knowledge, especially cloud based.
- Capable of defining the technical system requirements.
- Capable to provide technical guidance to the Software Supplier(s)
- Solid experience in communicating in an international environment.
- Capacity to communicate at any level of an organization
- Good presentation skills
- Fluent in English and at least 1 other European Language.
- Excellent team-work and motivational skills
- Problem solving skills
- Flexibility, proactivity and a focus on results.

What we can offer you

- A full-time position in Brussels. Our offices are easily accessible by Public Transport
- An attractive package including extra-legal benefits (Group insurance, hospitalization insurance, Meal voucher, ...)
- Homeworking granted as per EMVO's rules.
- A dynamic working environment with an open culture and pleasant atmosphere
- The possibility to take ownership of the technical software Architect/Environment
- A learning environment in which the European Pharmaceutical sector opens up to you

If this sounds like a match, then we want to hear from you

Send your CV and motivation to recruitment@emvo-medicines.eu before December 20th
