

LETTER OF ANNOUNCEMENT
Master Data Maintenance – Versioning and Retrospective Upload

6th March 2020

Dear all,

We would like to inform you that EMVO has created a document to provide further information on how versioning and the retrospective data upload work.

The document “Master Data Maintenance – Versioning and Retrospective Upload” elaborates on the importance of correctly maintaining Product Master Data and describes in a detailed manner the correct way of keeping the list of countries where products are marketed up to date. Furthermore, the newly developed document contains key questions raised by OBPs aiming to achieve a better explanation of retrospective uploads.

For your convenience, please [click here](#) to view the document.

Please kindly note that the document “Master Data Maintenance – Versioning and Retrospective Upload” is also available in the **technical information pack folder** in the OBP Portal.

Finally, and in order to provide additional support and explanations, please note that EMVO is currently working on a more extensive Guidance document going deeper into the maintenance of Product Master Data which will become available in the coming months.

In the event of any questions or uncertainty, please do not hesitate to contact our Helpdesk:
