

LETTER OF ANNOUNCEMENT
Update: Renewal of EU Hub Public Certificates & alert endpoints

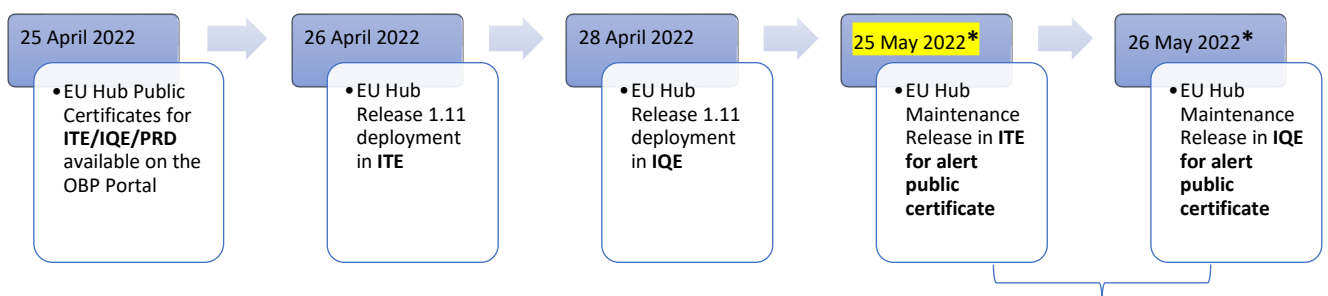

11th May 2022

*The below information is important for your technical team and/or connection provider. Please forward this message to them. **If you are using EMVO Gateway as a connection provider, no actions are needed.***

As communicated in the [Letter of Announcement](#) shared on 26th April, the EU Hub Public certificates and endpoints require an update. EMVO distributed a timeline indicating the important dates affecting the environments (ITE/IQE & PRD).

We would now like to inform you that the EU Hub Maintenance Release in ITE for the alert public certificate is extended to **25th May**. Please refer to the updated diagram below for all the needed information which will allow the technical teams and connection providers to plan ahead.

The updated timeline for ITE & IQE Environments is as follows:

***OBP Action:** Ensure that the active alert endpoints as registered in the EU Hub are updated with the new EU Hub Public certificates.

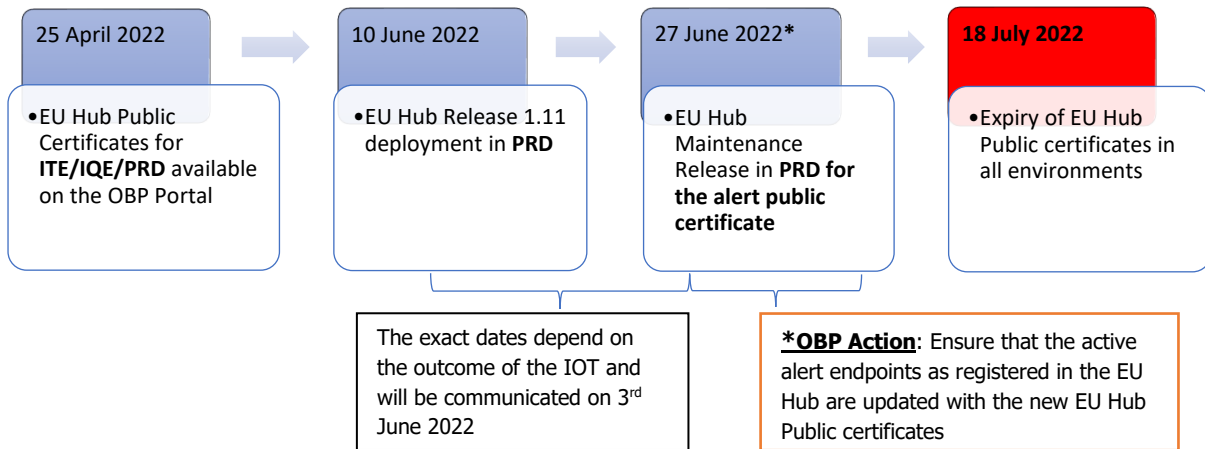

Be reminded that EMVO organised four (4) separate Q&A sessions to provide further guidance. Note that the attendance per session is limited to 250 participants. The sessions will be recorded and made available following each meeting.

Your technical team and/or connection provider can register for the last sessions by clicking on the link below. Due to the limited capacity, we kindly ask you to register for only one session.

- [Register for the session on Wednesday May 11th from 15:00 to 16:00 CEST](#)
- [Register for the session on Wednesday May 18th from 15:00 to 16:00 CEST](#)

The timeline for PRD Environment remains as follows:
