

LETTER OF ANNOUNCEMENT
Update: Renewal of EU Hub Public Certificates & alert endpoints

31st May 2022

*The below information is important for your technical team and/or connection provider. Please forward this message to them. **If you are using EMVO Gateway as a connection provider, no actions are needed.***

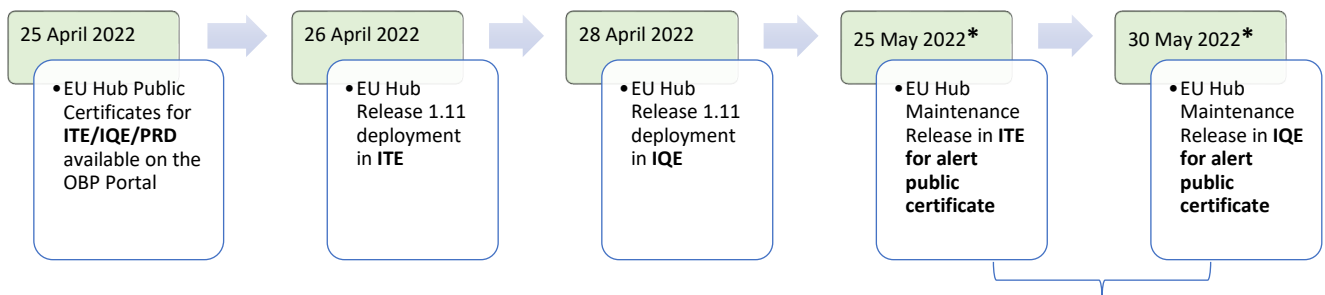

As communicated in the [Letter of Announcement](#) shared on 26th April, the EU Hub Public certificates and endpoints require an update. EMVO distributed a timeline indicating the important dates affecting the environments (ITE/IQE & PRD).

We would now like to inform you that the **EU Hub Maintenance Release was successfully deployed to the ITE & IQE environments for the alert public certificate**. Please refer to the diagrams below for all the needed information which will allow the technical teams and connection providers to plan ahead.

We advise all OBPs to ensure that the active alert endpoints, as registered in the EU Hub, are updated with the new EU Hub Public certificates in the ITE & IQE environments.

EMVO will inform you as soon as the EU Hub Maintenance Release has been successfully deployed to the PRD Environment. This is currently planned for 27th June.

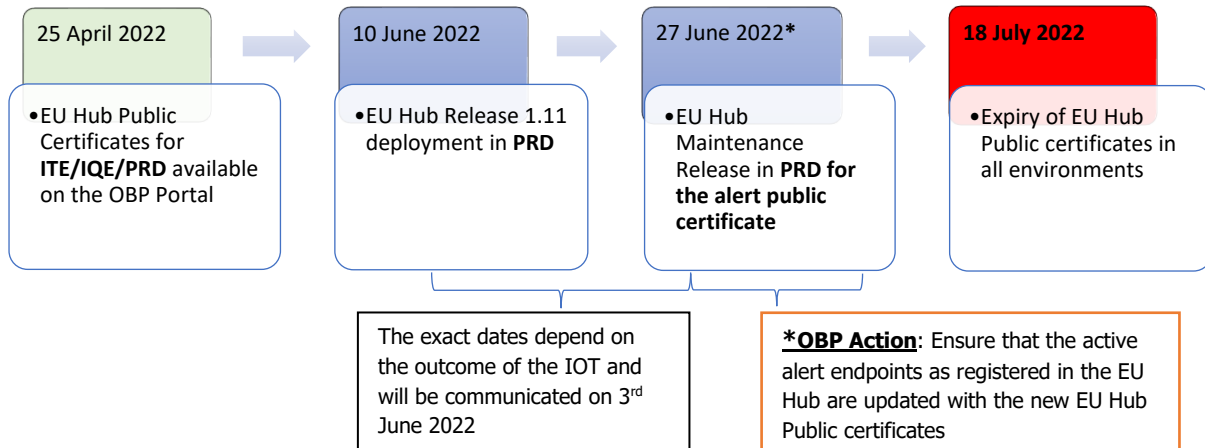

The timeline for ITE & IQE Environments is as follows:

***OBP Action:** Ensure that the active alert endpoints as registered in the EU Hub are updated with the new EU Hub Public certificates.

Be reminded that EMVO organised four (4) separate Q&A sessions to provide further guidance. Please refer to the Q&A document *Version 4* [here](#) which summarises the most frequently asked questions during the sessions, as well as the meeting recordings. Be kindly reminded that you can find the Q&A document on EMVO's website under the Knowledge Database.

The timeline for PRD Environment remains as follows:

Should you have any questions, please do not hesitate to contact our Helpdesk.
