

**LETTER OF ANNOUNCEMENT**  
**Webcast Series - EMVO Gateway training**

12<sup>th</sup> December 2022

EMVO is excited to share another episode of the *EMVO Webcast series* – a series of remote training sessions and webcasts aimed at providing you with useful information on a diverse set of topics related to the EMVS.

This episode focuses on the **EMVO Gateway** and covers its functionalities. We encourage you to consult the [EMVS Master Data Guide](#) and the [Data quality webcast episode](#) which go hand in hand with the training. Note that in addition, the EMVO Gateway user manual is available in the Technical Info Pack under *Step 4* of your OBP Portal account.

**The EMVO Gateway is a web-based portal that provides a single web entry point for OBPs to interface with the European Hub**; adhering to the stringent security protocols and technical requirements which must be met for compliance. The portal offers a reliable and flexible organisational architecture and extends the functionality of the core services to unburden companies of the considerable cost of developing, securing and maintaining their own services.

If you want to find out more about the EMVO Gateway, **watch the online training [here](#)** and on EMVO's website ( Knowledge Database → Videos).

Should you have any questions, please do not hesitate to contact our Helpdesk.
