

LETTER OF ANNOUNCEMENT
EU Hub Release 1.13: Planned deployment dates for ITE, IQE & PRD

30th March 2023

EMVO can now officially announce the deployment dates for Release 1.13 of the EU Hub:

- **ITE** currently planned for **24th April 2023**;
- **IQE** currently planned for **26th April 2023**;
- **PRD** currently planned for **June 2023**; the exact date depends on the outcome of the Interoperability testing (IOT) and will be communicated afterwards.

A **10-minute downtime** is expected during the deployment in ITE and IQE. The downtime can occur anytime between 09:00 CEST and 17:00 CEST. Due to the nature of the deployment, EMVO is not able to indicate the exact downtime slot.

Be aware that **older ciphers will be removed with the deployment of Release 1.13**. To remain connected to the EU Hub, we strongly urge you to start using the ciphers which the EU Hub is already supporting in all environments. Please refer to this [Letter of Announcement](#) from March 2023 to find out more.

For further information regarding the items covered in the Release 1.13, we invite you to consult the Release Note, which together with the Software Development Kit (SDK) and other Technical Documentation associated with Release 1.13 will be available on 17th April in the Technical Information Pack on the OBP Portal.

EMVO will inform you when Release 1.13 has been successfully deployed in ITE and IQE.

Should you have any questions, please do not hesitate to contact our Helpdesk.
