

LETTER OF ANNOUNCEMENT
EU Hub Release 1.14: Postponement of deployment to ITE

23rd October 2023

Due to technical reasons, the deployment of the EU Hub Release 1.14 to the ITE Environment has been **postponed to Wednesday, 25th October 2023**.

A **10-minute downtime is expected** during the deployment in ITE. The downtime can occur anytime between 09:00 CEST and 17:00 CEST. Due to the nature of the deployment, EMVO is not able to indicate the exact downtime slot.

Be informed that with the deployment of the EU Hub Release 1.14, the '**CR_13062: Remove Retrospective Upload for already long on-boarded markets**' will be implemented which will remove the retrospective upload for already long on-boarded markets.

Consequently, the EU Hub will no longer accept retrospective upload of Product Master Data (PMD) which includes any changes in the Target Markets unless the OBP needs to add the market of Greece and/or Italy. Any other data will still be available for modification, if needed.

OBPs can update the PMD with the addition/deletion of markets by **creating a new PMD version**. To find out more about the upcoming changes, please consult [this overview](#).

For further information regarding the items covered in the Release 1.14, please check out the Release Note, which together with the Software Development Kit (SDK) and other Technical Documentation associated with Release 1.14 will be available end of October in the Technical Information Pack on the OBP Portal.

EMVO will inform you when Release 1.14 has been successfully deployed in ITE.

Should you have any questions, please do not hesitate to contact our Helpdesk.
