

**LETTER OF ANNOUNCEMENT**  
**EU Hub Release 1.14: Confirmation of deployment to ITE**

26<sup>th</sup> October 2023

EMVO can officially announce that **Release 1.14 was successfully deployed to ITE** on October 25, 2023.

Be informed that with the deployment of the EU Hub Release 1.14, the '**CR\_13062: Remove Retrospective Upload for already long on-boarded markets**' will be implemented which will remove the retrospective upload for already long on-boarded markets.

Consequently, the EU Hub will no longer accept retrospective upload of Product Master Data (PMD) which includes any changes in the Target Markets unless the OBP needs to add the market of Greece and/or Italy. Any other data will still be available for modification, if needed.

OBPs can update the PMD with the addition/deletion of markets by creating a new PMD version. To find out more about the upcoming changes, please consult [this overview](#).

For further information regarding the items covered in the Release 1.14, please consult the Release Note, which together with the Software Development Kit (SDK) and other Technical Documentation associated with Release 1.14 are available in the Technical Information Pack on the OBP Portal.

EMVO will inform you when Release 1.14 has been successfully deployed to IQE. Currently, the deployment is planned to take place on **Friday, 27<sup>th</sup> October** with an **expected 10-minute downtime** that can occur at anytime between 09:00 to 17:00 CEST. Due to the nature of the deployment, EMVO is not able to indicate the exact downtime slot.
