

LETTER OF ANNOUNCEMENT
EU Hub Release 1.14: Confirmation of deployment date for PRD

8th January 2024

Following the successful results of the Interoperability Test (IOT), EMVO can confirm the official deployment date of the EU Hub Release 1.14 in PRD: **Saturday, 20th January 2024**.

There is a **twelve (12) hour downtime window starting at 09:00 CET on 20th January and ending at approx. 21:00 CET on 20th January**.

Be informed that with the deployment of the EU Hub Release 1.14, the '**CR_13062: Remove Retrospective Upload for already long on-boarded markets**' will be implemented which will remove the retrospective upload for already long on-boarded markets.

Consequently, the EU Hub will no longer accept retrospective upload of Product Master Data (PMD) which includes any changes in the Target Markets unless the OBP needs to add the market of Greece and/or Italy. Any other data will still be available for modification, if needed.

OBPs can update the PMD with the addition/deletion of markets by **creating a new PMD version**. To find out more about the upcoming changes, please consult [this overview](#).

For further information regarding the items covered in the Release 1.14, please consult the Release Note, which together with the Software Development Kit (SDK) and other Technical Documentation associated with Release 1.14 are available in the Technical Information Pack on the OBP Portal.

EMVO will inform you when Release 1.14 has been successfully deployed in PRD.

Should you have any questions, please do not hesitate to contact our Helpdesk.
