

LETTER OF ANNOUNCEMENT
EU Hub Release 1.14: Confirmation of deployment to PRD

22nd January 2024

EMVO can officially announce that **Release 1.14 was successfully deployed to PRD on 20th January 2024.**

Be informed that with the deployment of the EU Hub Release 1.14, the '**CR_13062: Remove Retrospective Upload for already long on-boarded markets**' is now implemented which removed the retrospective upload for already long on-boarded markets.

Consequently, the EU Hub no longer accepts retrospective upload of Product Master Data (PMD) which includes any changes in the Target Markets unless the OBP needs to add the market of Greece and/or Italy. Any other data is still available for modification, if needed.

OBPs can update the PMD with the addition/deletion of markets by **creating a new PMD version**. To find out more about the introduced changes, please consult [this overview](#).

For further information regarding the items covered in the Release 1.14, please consult the Release Note, which together with the Software Development Kit (SDK) and other Technical Documentation associated with Release 1.14 are available in the Technical Information Pack on the OBP Portal.

Should you have any questions, please do not hesitate to contact our Helpdesk.
