## **The Latvian Medicines Verification System Goes Live!**

### **Dear FMD Stakeholders!**

We are proud to announce that on June 28<sup>th</sup>, the Latvian Medicines Verification System (LZVS) was connected to the EU Hub live production environment.

This important milestone of the project was successfully completed in close collaboration with other NMVO's, Arvato Systems and with support by the EMVO team. I would like to use this occasion to express my gratitude to everyone who contributed to this success: Latvian Medicines Verification Organization (LZVO) Shareholders and Board members, our team members, all consultants and authorities engaged in this project during the last two years.

During the following two months, we will execute the next phase of our project with participants ready to onboard to the EU Hub and with end-users ready to connect to the LZVS.

We kindly ask manufacturers and OBP's to start uploading product and pack data (products for the Latvian market) to the EU Hub as soon as possible to support the common success of the project. We are ready to receive your data. The upload of data for packs that are already in the market is extremely important in view of the use of the system by the supply chain actors who will also start connecting to the system.

We would like to express our thanks to all the MAHs who have already signed up with LZVO. If you have not yet signed the Cooperation Contract, more details are available at website <http://www.lzvo.lv/en/pharmaceutical-companies-mah/>.

For further information about Latvian Medicines Verification System, please visit our website [www.lzvo.lv](http://www.lzvo.lv) or contact us by email [info@lzvo.lv](mailto:info@lzvo.lv).

With kind regards,

Inese Erdmane  
General Manager, Chairman of the Board  
Latvijas Zāļu verifikācijas organizācija
