## The Slovak Medicines Verification System Goes Live!

Dear FMD Stakeholder,

We are pleased and proud to announce that the Slovak Medicines Verification System is connected to the EU Hub production environment from 26<sup>th</sup> June 2018

This important milestone was successfully completed in collaboration with other NMVO's, ARVATO and with support by the EMVO team. Furthermore, with the excellent support of the SOOL Board members (AIFP, GENAS, AVEL, SLeK) and Slovak State Institute for Drug Control, who continuously worked on this project over the last two years.

We have run successful preproduction tests with a couple of MAHs and End Users and would now strongly encourage On-boarding partners (OBPs) to start uploading pack data to the EU Hub as soon as possible. We are ready to receive your data.

We also want to emphasize the importance of retrospective uploading to avoid unnecessary alerts in the system. If you are an OBP with serialised packs already on the Slovak market, please make sure you download the data of those packs into the Hub retrospectively. For single market packs you may upload immediately, **for multi-market packs you may do so after the next Hub release 1.4 scheduled to take place by August 31st.**

We would like announce registration portal for MAH through which MAH will be able to sign up with Slovak Medicines Verification Organization (SOOL) and fulfil its duties relevant to FMD.

The registration portal is available at [www.sool.sk/mahregistration](http://www.sool.sk/mahregistration)

For more news from SOOL please follow us on LinkedIn at [LinkedIn](#) or get in touch with us by email [kancelaria@sool.sk](mailto:kancelaria@sool.sk).

Best regards,

Ing. Roman Guba  
Executive Director  
Slovak Medicines Verification Organization
