CONNECTION OF THE NORWEGIAN NMVS TO EU HUB PRODUCTION ENVIRONMENT

We are pleased to announce that from June 15th, the Norwegian Medicines Verification System is connected to the European Hub live production environment.

Nomvec was able to reach this important milestone through great teamwork, and thanks to the support and collaboration of other NMVO's, Arvato Systems and the EMVO team.

The next phase of the project will focus on enabling participants to onboard to the EU Hub and continue to work with the Norwegian end-users to connect to the national system.

We kindly ask manufacturers and OBP's to start uploading product and pack data (products for the Norwegian market) to the EU Hub as soon as possible to support the common success of the project.

For further information about the Norwegian Medicines Verification Organisation and the Norwegian Medicines Verification System, please visit our website www.nomvec.no or follow us on twitter [@nomvec](https://twitter.com/nomvec)

Best regards,

Kai Mjaanes
