

Ljubljana, 6.4.2018

Dear FMD stakeholders

I am glad and proud to announce, that Slovenian National medicines verification system is now connected to European HUB on the production environment.

With dedication, persistence, necessary pragmatism and professional cooperation with our Blueprint supplier, Solidsoft Reply, we managed to complete testing and validation activities according to EMVS Quality Management standards and good practices.

It feels good to set a milestone as a first blueprint country, but I am far prouder, that we managed to establish such great collaboration with other NMVO representatives, who joined us on this journey. This is indeed a joint success, and I am glad, that I can share it with such wonderful team of colleagues across Europe.

Achieving this milestone, I would like to invite manufacturers to participate in our Pilot with uploading data for all serialized products that they have available on Slovenian market. Do not hesitate to contact us for assistance or if you require any additional information.

Our contact information is:

Email: office@zapaz.si

Phone: +00386 8 200 72 78

Lastly, I need to thank my talented team in Slovenian NMVO:

- Luka Svete, IT operations manager
- Marko Verbič, Quality manager
- Erika Žefran, Administrative assistant

Thank you for joining and helping me, you did this!

Mitja Pirman
Managing Director
Medicines Verification Institute Slovenia
