

Stockholm 2018-04-10

Dear FMD Stakeholders,

I am proud to announce that the Swedish System for Medicines Verification (SMVS) now is up and running, connected to the Eu HUB Production environment!

This is an achievement made possible by

- a hard-working, skilled and dedicated team in Sweden
- a very good cooperation between all Solidsoft Reply customers and Solidsoft Reply
- a strong support from EMVO.

We have in Sweden been determined to be in the front of this development, have worked closely with all our national stakeholders for many years and now, after a lot of dedicated and hard work, it is a great pleasure to be able to announce that this most important of milestones is reached!

We will now proceed with the pilot in three steps according to our plan. We have engaged Wholesalers and Pharmacies to connect to our system as soon as possible and we have a number of MAHs working with us already. We are inviting all of you to participate in a format we can agree and we certainly encourage you to serialise your packs for the Swedish market and upload the information to the EU HUB so we can scan the packs when they are available on the market. Please contact us at [www.e-vis.se](http://www.e-vis.se)

I will end with a big thank you to my Swedish team. Without their strong engagement and useful, previous experience from different areas, this would not have been possible:

- Anci Kvarnström, Program Manager
- Torbjörn Sjölin, IT Operations Manager
- Jonas Kreku, IT Manager
- Carita Ulfhielm, Quality Manager

Anita Finne Grahnén  
General Manager
